Dublin, Ireland | 0899442812 | solanatayo@gmail.com | <https://www.linkedin.com/in/olutayosolana>

PROFILE SUMMARY

Product Manager with experience spanning product launches, experimentation, analytics, QA/UAT, user research, and digital product delivery. Evaluated product documents, spreadsheets, dashboards, presentations, requirements, user flows, and performance data to assess their accuracy, completeness, usability, rigor, and alignment with business needs. Skilled in PowerPoint, Excel, Google Workspace, Tableau, Power BI, SQL, and Python, with practical experience spanning fintech, banking, analytics, and digital products.

SKILL HIGHLIGHTS

- ✦ **Product Management:** Roadmaps, MVPs, prototyping, prioritization, vite coding for rapid build-test cycles
- ✦ **Data and AI:** Analytics, AI/LLM applications, SQL, and translating data into product decisions.
- ✦ **Payment and Finance:** Experience in digital payments and finance systems.
- ✦ **Agile Methodology:** Scrum and Kanban execution for shipping and iteration.
- ✦ **Tooling:** Excel, Python, Power BI, Tableau, Jira, Confluence, AzureDevOps.

PROFESSIONAL WORK EXPERIENCE

Interswitch Ltd	Product Owner	May 2022 – August 2024
- Evaluated product performance against engagement, retention, churn, and satisfaction KPIs, contributing to 20% higher engagement, 11% lower churn, and 15% higher user satisfaction. - Served as Product Owner for four scrum teams developing Mobile Apps, spearheading the development and execution of product roadmaps, resulting in a 20% increase in user engagement by introducing strategic features like recurring payments, and digital wallet enhancements. - Identified and documented requirements for third-party APIs, ensuring seamless integration and functionality within the developed products. - Spearheaded the development of a big data analytics products, a dashboard that leverages Apache Kafka, an ML Model for personalized credit checks, by leading a cross functional team of ML and Analytics Engineers. Demonstrated success in integrating machine learning capabilities that personalized user experiences and optimized product performance. - Collaborated with technical teams to specify the technical requirements for MVPs, including system architecture, technologies to be used, and integration points. Collaborated closely with clients and internal teams to define the set of features that constitute the MVP, ensuring alignment with the project's goals and constraints. - Cross-checked product analytics, customer feedback, and proposed solutions to uncover performance gaps, inconsistencies, and unsupported assumptions. - Conducted usability testing, then assessed the findings against established product and customer experience objectives. - Reviewed product metrics alongside user behaviour to determine whether initiatives met their defined success criteria and expected outcomes. Turned the findings into clear, prioritised written feedback for technical, product, and business stakeholders.		

Omnibiz Africa**Product Manager, Demand****| October 2021 - April 2022 |**

- Achieved an 8.5% growth in Monthly Active Users implementing growth hacks and improvements in user flows.
- Crafted Go-To Market strategy for newly launched features and ensured the strategy was well executed
- Gathered requirements for an Internationalization project, created Gantt charts detailing project deadlines and milestones. Supported User Acceptance Testing (UAT), business readiness and production releases by working closely with business stakeholders and engineering teams.
- Automated manual assignment tasks by creating detailed process flow maps engineering could easily understand.
- Identified user pain points by conducting interviews, spawning innovative solutions.
- Performed in-depth market analysis, identifying key competitors and customer expectations, which informed the product strategy and led to a significant reduction in churn rate.
- Ideated and developed an inventory management and bookkeeping app using best in class product development practices.
